

The following list of functions and their milestones provides a rough overview of the currently desired features. This list is not comprehensive and the order presented does not reflect our priorities.

Milestone 0 – Current State of Development

This milestone represents our Minimum Viable Product (MVP) version, which offers very basic functionality.

- Fixing data bugs and incorporating feedback from Milestone 0
 - The actual feedback consists of a large number of minor issues. (Ole?)
 - The actual feedback consists of a large number of UI related issues. (Ole / Gert-Jan?)

Milestone 1

This feature set is tailored for smaller companies that have used solutions like Funeral Office and MEC, and is also suitable for "Animal Funeral Homes," a significant market.

- Package pricing
- To-dos and checklists
- Creating order-types with the possibility to add Priceline's and To-Dos to certain order-types
- A tab with information on funeral articles
- A tab with information on funeral printing
- Taking notes and timeline in quick menu
- Data migration
- Tenants → subsidiaries / Multiple companies, including divisions and branches
- Utilizing the newly created tool to add and remove fields.
- Include the option to display a calendar filtered by employee, event type, or other criteria.
- An administrative interface that allows for the copying of resources, concatenations, documents, contacts, and locations.
- Roles and user management
- Factoring Part 2: send the invoice and 'death certificate' to the factoring company.
- Generate documents using info from the 'Unsubscribing' tab.
- GDPR - Deletion Policy, Data Backup etc.

Milestone 2

This is the further development of Milestone 1 also suitable for larger companies.

- Datev-API
- Tab with Cockpit-View
- Documents: So far only printing, in the future documents should also be saved or sent from the program

- Displaying or hiding fields based on the case type.
- Further integration of the Quick-Menu
- Cash Payment issues.
- Additional Invoice Recipient

Milestone 3

This is the starting point of our “final” version, suitable for Rapid Data costumers and larger German SERENI users:

- Crematorium API
- On-call, Vacation, and Absence Calendar
- Inventory management.
- Calendar for resources
- Manual entries to Calendar
- Statistics
- Logging
- Communication Center
 - E-Mail
 - WhatsApp
